## The Sun

The sun is a star. It is closer to Earth than any other star. This is why it looks bigger and brighter than other stars.

The sun gives us light and heat. It heats the air, land, and oceans. It is much hotter than Earth. People and animals on Earth would not be able to live without the sun. Earth would be so cold that the planet would freeze.

Some scientists study the sun. They want to learn more about it.

1. The sun is
  - A. a planet.
  - B. a star.
  - C. an ocean.
2. The sun does not
  - A. cool the air.
  - B. give light.
  - C. give heat.
3. The sun is
  - A. colder than Earth.
  - B. hotter than Earth.
  - C. the same temperature as Earth.
