Family Note

In addition to counting actual objects, children enjoy the rhythm and pattern of reciting numbers in order. As children develop their oral counting skills, they also become aware of the patterns and structure of our number system. Encourage children to count as far as they can, and give subtle hints or prompts to help them count a little higher each time. Children enjoy seeing how high they can go, and they gain a real sense of power when they can start counting from any number.

Practice counting to 100.

Start counting at 1. Then start at another number such as 15, 27, 49, or 62.

Try these counting challenges!

- Count past 100. How far can you go?
- Count down to 0. You may wish to count along with a timer that counts backward.
